

Comcast in Colorado Springs: Delivering More Than Supersonic WiFi

Comcast recently launched multi-gigabit internet in Colorado Springs, making it the first community in the state to benefit from the company's new 2-gig download tier. It's all possible through our continued investment in Colorado's network infrastructure:

300

Comcast has more than 300 miles of fiber in Colorado Springs – more than 10,000 miles throughout the state of Colorado.

2.3M

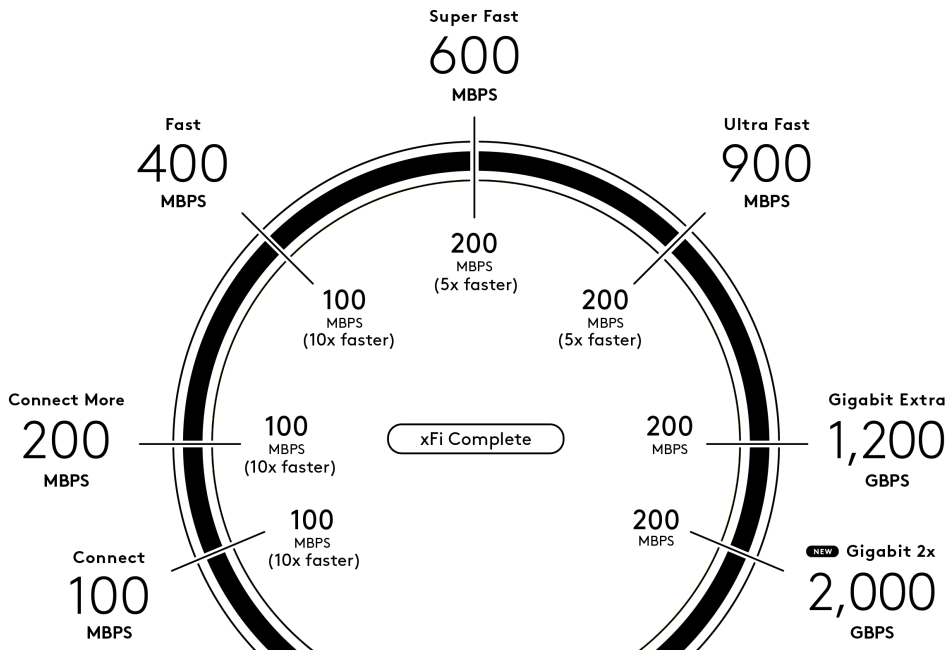

More than 2.3 million homes and businesses have access to Xfinity and Comcast Business statewide, including more than 400,000 in Colorado Springs.

\$1.2B

Comcast has invested more than \$1.2 billion in its network in Colorado alone in the last three years.

2X

We make continuous investments in building network capacity to stay ahead of demand – effectively doubling our capacity every 2.5 years.

1

SPEEDTEST

Xfinity has been identified as the fastest Internet provider in Colorado according to global network intelligence and connectivity insights leader, **Ookla®**, according to their Q2 2022 Speedtest Global Index rankings.

Comcast's Commitment in Colorado

Comcast uses the power of its platforms to create positive change in the communities we serve:

internet essentials

Internet Essentials: Since 2011, Comcast has connected nearly 600,000 income-constrained Coloradans through its Internet Essentials Program—the nation's largest and most successful private-sector low-income broadband adoption program. The program provides income-eligible people the ability to connect to the Internet for \$9.95 per month

Lift Zones: As part of Comcast's ongoing commitment to help connect low-income families to the internet, we equipped nearly 100 community centers and other facilities across Colorado with WiFi-connected Lift Zones, where students and adults can participate in digital learning, trainings, and access critical resources.
