# Personalize, Control, Secure your WiFi Devices

13+ Connected devices per person expected by 2022

50+ Connected devices per household expected by 2020

XFINITY xFi

Gives consumers visibility into all the devices that are connected to their home WiFi network, and allows them to organize, monitor and personalize their experience.

AVAILABILITY

Available now to Xfinity Internet customers at no extra charge, xFi can be accessed online, via the xFi mobile app or on the television.

With xFi, customers can:

| View and modify WiFi names and passwords | Set WiFi parental controls, time limits and bedtime schedules | Pause internet access for one or more devices | Set safe browsing modes for kid-appropriate content | Add xFi Advanced Security to help protect connected devices |

PERSONALIZATION

Create profiles, assign devices to individuals and give nicknames for easy reference.

PARENTAL CONTROLS

Simple and powerful parental contols allow consumers to protect their kids while they browse.

SECURITY

Protect all conntected devices on your home network, including those without screens.
